5) Notice of Informal Patent Application (PTO-152)

Ápplication/Control Number: 10/085,448

Art Unit: 2833

1. Claims 5-7 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter

which was not described in the specification in such a way as to enable one skilled in the art to

which it pertains, or with which it is most nearly connected, to make and/or use the invention.

There is no support for the claim recitation of "embossment" and "gap". How a light bulb would

be used in the invention is very unclear. Thus these limitations will not be considered for

patentability.

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every

feature of the invention specified in the claims. Therefore, the "embossment", "gap", and "light

bulb" must be shown or the feature(s) canceled from the claim(s). No new matter should be

entered.

A proposed drawing correction or corrected drawings are required in reply to the Office

action to avoid abandonment of the application. The objection to the drawings will not be held in

abeyance.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the

basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention

thereof by the applicant for patent.

Application/Control Number: 10/085,448

Art Unit: 2833

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

- 4. Claims 1-5 and 7 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Wu.
- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Wu as applied to claim 1 above, and further in view of Brown et al.

Brown et al (Fig. 5) shows the upper ground pin having a circumferential rib, and to provide the ground pin receptacle of Wu with such a rib thus would have been obvious, to better secure the receptacle to the housing.

7. The other references are cited to show similar connectors.
